Improve your YouTube experience with the Magic Actions for YouTube add-on for Opera. The extension comes with a lot of functions and tweaks that allow you to change the way you watch videos on the popular platform. With color filters, video effects, a customizable cinema mode, and more features, this app will help you personalize your favorite YouTube vids. Once you have installed the add-on, it displays an easy-to-use menu right below the video frame. From there, you can quickly control everything that the app offers. Accordingly, in just a few clicks, you can add new color filters and change the look of the vids. You can choose between high contrast, sepia, black and white, red filter, invert, vintage, and more. Also, with the so-called Magic Transform function, you can straightforwardly add new effects to the vid, such as vinyl, zoom, horizontal and vertical flip, and several others. Moreover, you can capture snapshots from the videos, edit them with Magic Actions for YouTube, and save them on

your computer. Lots of settings and tweaks The extension gives you access to lots of settings and tweaks. To get to them, right-click the add-on's icon in the toolbar, and you will be redirected to the Options section of the app on the developer's site. You can change the OSD color, enable Auto HD or choose the preferred resolutions for the videos, enable enlarged thumbnails, and many more. Also, Magic Actions for YouTube allows you to change the appearance of the comment section with enlarged avatars and the clear view feature that increases the default size of the fonts. The extension makes YouTube lag The app is promising and indeed improves the user experience with YouTube videos. However, it makes YouTube lag and the computer freeze, especially when applying color filters and video effects on long vids. Overall, Magic Actions for YouTube for Opera does what it promises, only that it causes YouTube to lag and even freeze, on some occasions.
